ADVANCED FABRICS BY SANTANDERINA

WOOLTECHS®

Maximum protection against molten metal splashes

Techs – Advanced Fabrics by Santanderina, has developed a revolutionary fabric that is changing the rules of the personal protection equipment inside the molten metal splash industry. Thanks to the combination of the best materials with the new double face technology, Wooltechs® is offering the best comfort-protection ratio level in the market.

- Highest molten metal splash protection
- Inherent FR blend
- New double face technology.
- Exceptional high wearing comfort. Double face technology
- Industrially washable
- Better shrinkage / Less odor
- Superior moisture management
- Better resistances
- High color / Look / Hand durability
- Different solutions:
280 gsm, 330 gsm, 375 gsm, 500 gsm

WOOLTECHS RIGHT FACE

This is how we identify right face of our articles.

For more information, ask us for our Wooltechs useful guide.

New double face technology

EN 11611

EN 11612

EN 1149

EN 61482-1-2

Para-aramid

By including para-aramid in our articles we ensure the best mechanical and shrinkage test results.

Wool outside

Wool is a natural fiber. It doesn't melt and it provides high heat insulation.

Lenzing FR inside

Lenzing FR® transports the moisture from the skin. It provides more efficient body cooling in extreme situations. Due to the more efficient body cooling effect, lactate concentration in the blood is lower, blood and oxygen supply to muscle is better. As a consequence, heat stress is lower and physiological performance higher in extreme situations.
